

## Person-Centered Planning

Each client in the program has goals based on their Person-Centered Plan that are monitored and supported by our staff. Staff is trained through community mental health service agencies to provide guidance and help the client reach his or her goals.

The Ready for Life Group CLS is funded by Medicaid through the use of group community living support units.

Each client has a Supports Coordinator they meet with for regular check-ins and annually to create the Person-Centered Plan. Our staff is involved

## Ready For Life Group CLS Program

Belong · Believe · Become

Ready for Life provides a community based training program for adults with development disabilities. Each client is part of the Ready for Life community as well as the greater Grand Rapids community (belong). Each has the autonomy to choose the volunteer site he/she will attend (believe), while gaining the independence skills they need to reach their goals (become).

When not at a volunteer site, clients are engaging in social emotional lessons in the classroom, exploring Kent and surround counties, enjoying leisure activities, working on their physical well-being and forming friendships with their peers.
